

I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you're making the television production of this program possible.

**- Norma Bixler**

# Part 2

# Age/ Earth

# How Old Is the Earth ... according to the Bible?

Present time to Jesus                      about 2000 years    55

Jesus back to Abraham                      about 2000 years

Abraham to Adam                              ????????

(Luke chapter 3, Genesis 5, 11)

Abraham to Adam                              about 2000 years    20

Thus according to the Bible, the age of the Earth is less than 10,000 years old.

## Easy evidences that the Earth is young

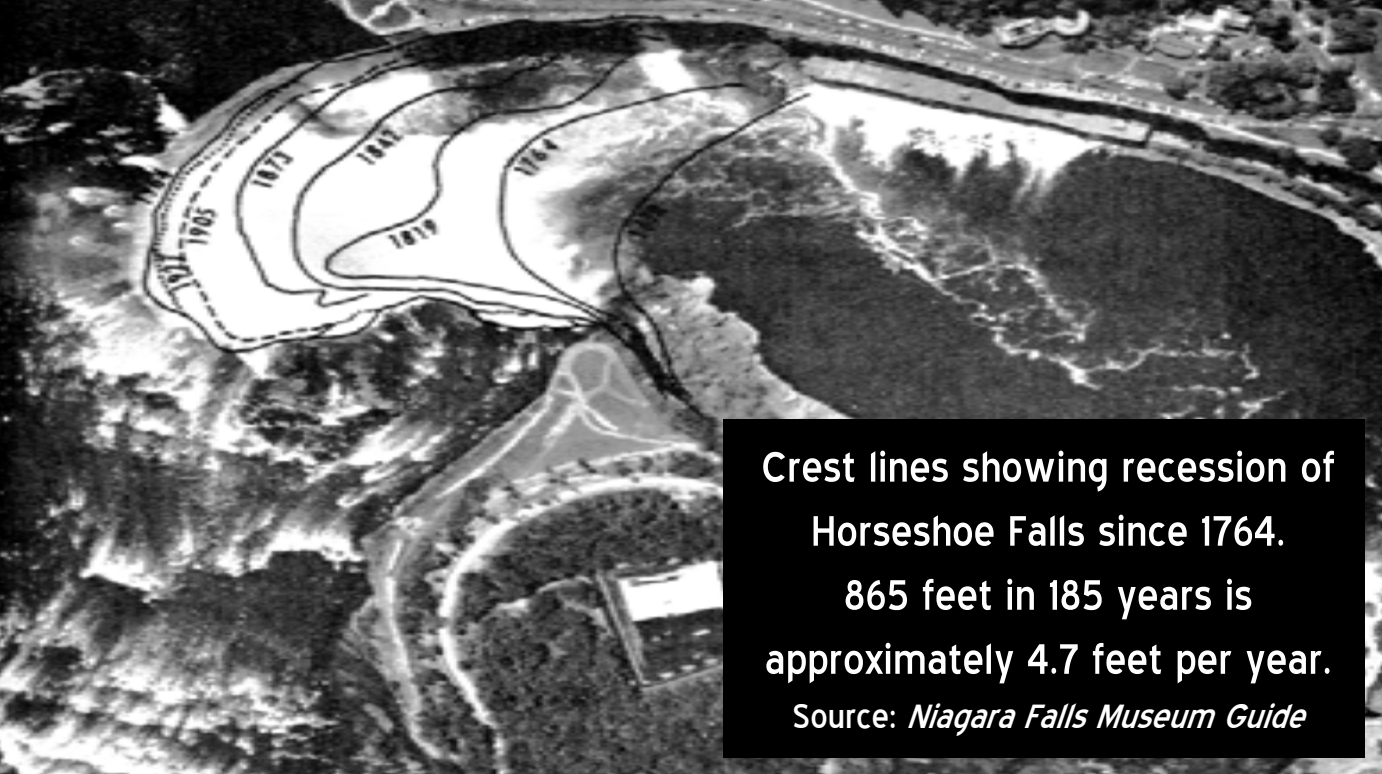

- Niagara Falls — *Prior to 1960s eroding 3ft/yr*
- Mississippi River and the Gulf of Mexico  
*(300 million cubic yards of sediment/yr)*
- Polystrate Fossils
- Grand Canyon *(Where is the 900 cubic miles of dirt?)*
- Population Statistics *(6.3 billion people)*

# NIAGARA

FROM THE AIR

Crest lines showing recession of  
Horseshoe Falls since 1764.

865 feet in 185 years is  
approximately 4.7 feet per year.

See *In the Beginning*  
Walt Brown p. 24

Millions of years of accumulation?  
No, even without Noah's Flood, we have less  
than 10,000 years of sediments.

Some polystrate trees are  
upside down extending  
through many layers  
including layers of coal.

Picture from  
*Bones of Contention*  
by Silvia Baker p. 12

*Polystrate tree trunks near Saint-  
Etienne, France.*

In Germany, France, the British Isles, Nova Scotia, California, and several eastern states, fossils that extend through several layers of sedimentary rock have been found. These are called polystrate\* (PAHL ee STRATE) fossils. They are usually tree trunks in an upright or somewhat slanted position. Polystrate fossils furnish clear-cut evidence that sediment was deposited rapidly, as in a flood. If the rock layers surrounding the fossils had formed at the slow rate that evolutionists assumed as they constructed the geologic time scale, the trees would have decayed or fallen rather than fossilized.

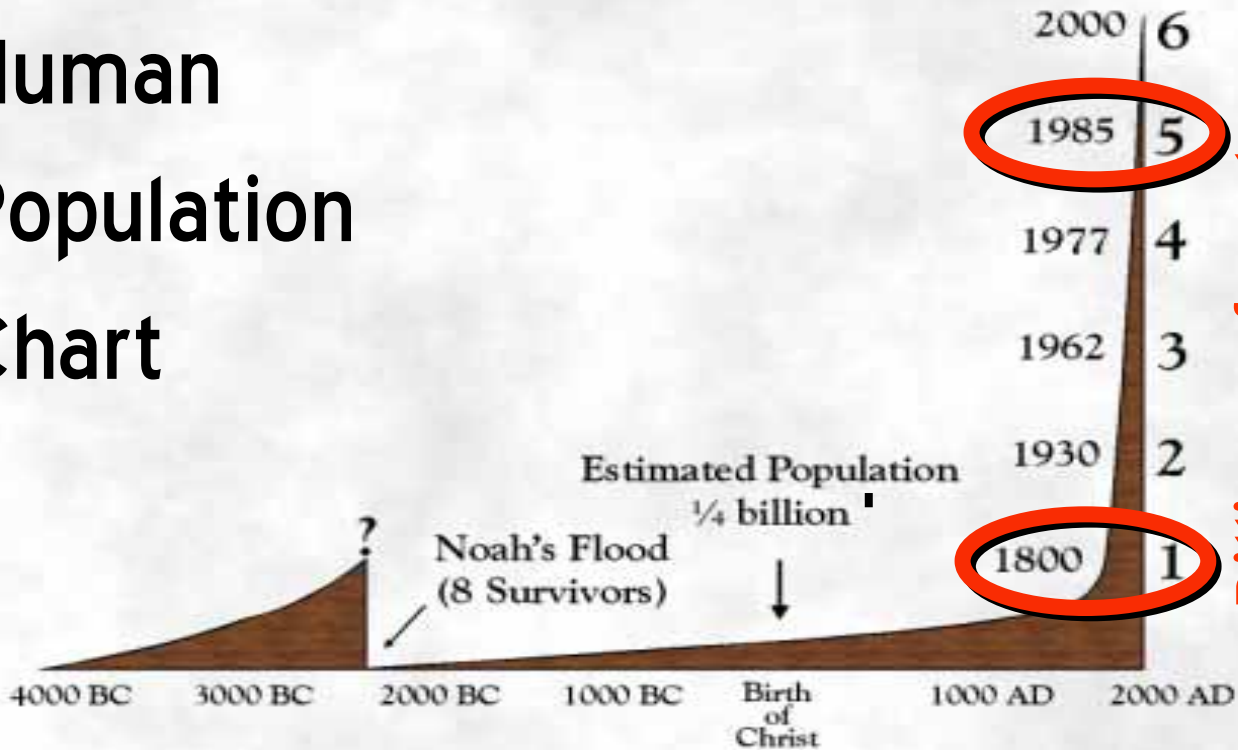

One type of polystrate fossil in California is especially interesting. Near Santa Barbara, fish fossils extend through several layers of algae fossils. Evolutionists calculate that each algae layer took hundreds or thousands of years to form. That would mean that the head and tail of the same fish were buried several thousands of years apart! Clearly the beds must have formed rapidly around the fish, not slowly. The most remarkable find was a polystrate whale fossil extending through many layers and many thousand

158-17 Polystrate tree trunk near Essen-Kupferdreh, Germany; the overall height of the tree trunk is approximately 7.6 m.

# Human Population Chart

**Billions of souls**

New Mexico's unfinished symphony was started 250 million years ago.

TINY drops of water, over millions of years, silently created the world's most awesome monument to the wonders of nature. Crystal Spring Dome and Hall of Giants are names that hint at some of the magnificent formations discovered in rooms the size of concert halls.

*Tiny drops of water,  
over millions of years, ...*

October 1953, p. 442

## 3 Trillion Humans: *That's a Lot of People!*

Evolutionists tell us that man became truly human about a *million years ago*.

With some simple calculations, the total number of people living on the Earth over the past million years should be about *three trillion!*

Where are all these people *buried*? And, what *happened* to their bones? There should be evidence all over the Earth, that *massive numbers of people* have lived over the past million years. But we don't find it. *Why Not?*
