I would like to personally thank you for watching the Origins program. Origins was a special program, near to the heart of my late husband, Russell Bixler.

I trust that the information in this presentation will be helpful in your study of creation science. Thank you for your prayerful and financial support of Origins... you're making the television production of this program possible.

Norma Bixler
In the beginning . . .

“In the beginning was matter, which begat the amoeba, which begat the worm, which begat the fish, which begat the amphibian, which begat the reptile, which begat the lower mammal, which begat the lemur, which begat the monkey, which begat man, who imagined God. This is the genealogy of man.”

- Charles Smith (1928)
In the beginning . . .

"In the beginning God created the Heaven and the Earth. And the Earth was without form, and void; and darkness was upon the face of the deep and the Spirit of God moved upon the face of the waters."

- Genesis 1:1-2
Is Evolution A Fact?

"...[E]volution is as well documented as any phenomenon in science, as strongly as the earth’s revolution around the sun rather than vice versa. In this sense, we can call evolution a ‘fact’.”

-Stephen Jay Gould

“Dorothy, It’s Really Oz”
Is Evolution A “Fact” Of Science?

“Evolution is a fact, like digestion”
- W.W. Howells “Mankind So Far”

“Evolution is a fact, like apples falling out of trees.”
- Stephen Jay Gould
  “Is Man a Subtle Accident?”
Evolution Is Being Taught As A “Fact” Of Science

“No serious biologist today doubts the fact of evolution ... The fact of evolution is amply clear. We do not need a listing of evidences to demonstrate the fact of evolution any more than we need to demonstrate the existence of mountain ranges.”

- J. Savage

“Evolution”
Richard Dawkins on Creationists

“It is absolutely safe to say that if you meet somebody who claims not to believe in evolution, that person is ignorant, stupid, or insane (or wicked, but I’d rather not consider that).”

- Richard Dawkins

Is Evolution A “Fact” Of Science?

“Scientists who go about teaching that evolution is a fact of life are great con men, and the story they are telling may be the greatest hoax ever. In explaining evolution, we do not have one iota of fact. It is a tangled mishmash of guessing games and figure juggling ...”

- Theodore Tahmisian, Nuclear Physicist
Fresno Bee
Is Evolution A “Fact” Of Science?

“Some scientists say, just throw energy at it and it will happen spontaneously. That is a little bit like saying: put a stick of dynamite under a pile of bricks, and bang, you’ve got a house! Of course you won’t have a house, you’ll just have a mess.”

- Paul Davies and Adam Phillips

“More Big Questions”
“We are, by astronomical standards, a pampered, cosseted, cherished group of creatures ... If the Universe had not been made with the most exacting precision we could never have come into existence. It is my view that these circumstances indicate the universe was created for man to live in.” - John O’Keefe (NASA astronomer)
Dr. Paul Davies

“There is for me powerful evidence that there is something going on behind it all ... It seems as though somebody has fine-tuned nature’s numbers to make the Universe ... The impression of design is overwhelming.”

Dr. Paul Davies
The Cosmic Blueprint
General or Organic Theory of Evolution

“On the other hand there is the theory that all the living forms in the world have arisen from a single source which itself came from an inorganic form. This theory can be called the ‘General Theory of Evolution’...”

- George A. Kerkut

“The Implications of Evolution”
The Implications Of Evolution

1. The first assumption is that non-living things gave rise to living material, i.e., spontaneous generation occurred.
2. The second is that spontaneous generation occurred only once.
3. The third is that viruses, bacteria, plants and animals are all interrelated.
4. The fourth assumption is that the Protozoa gave rise to the Metazoa.
The Implications Of Evolution

5. The fifth is that the various invertebrate phyla are interrelated.
6. The sixth is that the invertebrates gave rise to the vertebrates.
7. The seventh assumption is that with the vertebrates the fish gave rise to the amphibia, the amphibia gave rise to the reptiles and the reptiles to the birds and mammals. Sometimes this is expressed in other words, i.e., that the modern amphibia and reptiles had a common ancestral stock, and so on.

- G. A. Kerkut
The Creation Model

According to the theory of creation, or as it may be called more properly, the creation model, the Universe is not self-contained. Everything in the Universe, and in fact, the Universe itself, came into being through the design, purpose, and deliberate acts of a supernatural Creator.
The Law Of Biogenesis

George Wald, Nobel Laureate of Harvard University, once stated:

“Most modern biologists, having reviewed with satisfaction the downfall of the spontaneous generation hypothesis, yet unwilling to accept the alternative belief in special creation, are left with nothing. I think a scientist has no choice but to approach the origin of life through a hypothesis of spontaneous generation.”
The Origin Of Life . . . A Miracle?

“An honest man, armed with all the knowledge available to us now, could only state that in some sense, the origin of life appears at the moment to be almost a miracle, so many are the conditions which would have had to have been satisfied to get it going.”

- Francis Crick

The Origin Of Life . . . A Miracle?

“The likelihood of the spontaneous formation of life from inanimate matter is one to a number with 40,000 noughts after it.... It is big enough to bury Darwin and the whole theory of evolution. There was no primeval soup, neither on this planet nor on any other, and if the beginnings of life were not random, they must therefore have been the product of purposeful intelligence.”

- Sir Fred Hoyle “Hoyle on Evolution”
“Now imagine $10^{50}$ blind persons each with a scrambled Rubik cube, and try to conceive of the chance of them all simultaneously arriving at the solved form. You then have the chance of arriving by random shuffling at just one of the many biopolymers on which life depends.”

- Sir Fred Hoyle

“Hoyle on Evolution”
The chance that higher life forms have emerged in this way is comparable with the chance that a tornado sweeping through a junk-yard might assemble a Boeing 747 from the materials therein.

- Sir Fred Hoyle
  "Hoyle on Evolution"
Martin A. Moe (Evolutionist)

“A century of sensational discoveries in the biological sciences has taught us that life arises only from life, that the nucleus governs the cell through the molecular mechanisms of deoxyribonucleic acid (DNA) and that the amount of DNA and its structure determine not only the nature of the species but also the characteristics of individuals.”

- “Genes on Ice” Science Digest
What is coming into your homes ... and is it truthful?
Ardipithecus ramidus kadabba

This toe bone proves the creature walked on two legs.

-Michael D. Lemonick and Andrea Dorfman
Neanderthal Man

Probably the most well known “missing link,” between humans and apes.

At the International Congress of Zoology (1958), Dr. A.J.E. Cave said that his examination of the famous Neanderthal skeleton found in France over 50 years ago proved that it was simply an old man who suffered from arthritis!
Piltdown Man

This fossil find was proposed to be the “missing link” between humans and apes.

Forty years later scientists discovered that the fossil had been “reconstructed” using the skull from a medieval human and the jawbone of an orangutan.
Nebraska Man

From a single fossilized tooth, an entire species was manufactured.

The only problem was . . . The tooth was later identified as a tooth from an extinct pig!
Java Man

After removing about 10,000 cubic meters of dirt, workers uncovered a tooth (September 1891), then later a skull cap (October 1891), a femur (August 1892), and then one more tooth (October 1892).

Thirty-five years later, it was revealed that the femur is human and skullcap is from a giant gibbon!

Trinil 2

Dr. Dubois ... hid 2 modern skulls under the floorboards of his house for 26 years!
Rhodesian Man

Found in a zinc mine in 1921, this fossil was displayed prominently in the British Museum of Natural History.
Australopithecus afarensis ("Lucy")
Lucy – An upright hominid?

1. Curved fingers - and ape-like limb proportions
2. Locked wrists
3. Microwear on the teeth - fruit eater
4. Rib cage-conical, not barrel shaped
5. Semicircular canals of Australopithecines
6. Pelvis - Not large enough to give birth
What does the Fossil Record really show?

“What the ‘record’ shows is nearly a century of fudging and finagling by scientists attempting to force various fossil morsels and fragments to conform with Darwin’s notions, all to no avail. Today the millions of fossils stand as very visible, ever-present reminders of the paltriness of the arguments and the overall shabbiness of the theory that marches under the banner of evolution.”

- Jeremy Rifkin
If I were to mention the word coal, what would you think of?

- Lots of Vegetation?
- Lots of Heat?
- Lots of Pressure?
- Over Millions of Years?
It does NOT take millions of years

“In many geological situations much longer time intervals are available but evidently the molecular mechanism of decomposition is little changed by the additional time. Thus, within sedimentary basins, heating times of several years are sufficient for the generation of oil and gas from suitable precursors.”

- J. D. Saxby

“Petroleum Generation:”
It does NOT take millions of years

“For instance, it has been reported that in 1891 a Mrs. Culp of Morrisonville, Illinois dropped a shovelful of coal in transferring it to her cooking range, and a large lump broke in two, disclosing a lovely little gold chain of intricate workmanship neatly coiled and embedded.”

- Ivan T. Sanderson

“Uninvited Visitors”
How about human footprints in coal?

“On sites reaching from Virginia and Pennsylvania, through Kentucky, Illinois, Missouri and westward toward the Rocky Mountains, prints...have from time to time been found on the surface of exposed rocks, and more and more keep turning up as the years go by. What made these prints? As yet the answer is unknown to science. They look like human footprints and it often has been said, though not by scientists, that they really are human footprints made in the soft mud before it became rock.”
How about human footprints in coal?

“If man made these prints in this manner, then man’s antiquity is no matter of a mere million years or so, as scientists think, but a quarter of a billion years for they are found in rocks of the Carboniferous Period and those rocks were laid down about 250,000,000 years ago.”

-Albert G. Ingalls
“The Carboniferous Mystery”
Human Footprints In Coal

Albert G. Ingalls
"The Carboniferous Mystery"
Human Footprints in Coal

“The tracks are in formations considered to be in Upper Carboniferous (250 million years old) and show five toes and an arch which is unquestionably human. The tracks are 9½ inches long and 4.1 inches broad at the heel. The width at the forward end of the track by the toes was 6 inches. The being that left the tracks was a biped that walked uprightly like a human.”

-A. E. Wilder-Smith
“Man’s Origin, Man’s Destiny”
Human Footprints in Coal

“If man, or even his ape ancestor, or even the ape ancestor’s early mammal ancestor, existed as far back as in the Carboniferous period in any shape, then the whole science of geology is so completely wrong that all geologists will resign their jobs and take up truck driving. Hence, for the present at least, science rejects the attractive explanation that man made these mysterious prints in the mud of the Carboniferous period with his feet.”

-Albert G. Ingalls
“*The Carboniferous Mystery*”
Abolish God at all costs!

“We are forced to our adherence to materialism ... no matter how counter-intuitive, no matter how mystifying to the uninitiated. Moreover, that materialism is absolute, for we cannot allow a Divine Foot in the door.”

-Richard Lewontin
